

I recently purchased satellite radio for my car based on the availability of continuous traffic and weather information in the NY metropolitan area. I find this service very helpful since by occupation requires that I spend a significant amount of time traveling from location to location. I also enjoy the other programming but based my decision to buy a three year subscription entirely on the availability of the current traffic and weather information.

I would be extremely disappointed to lose this valuable information source since it saves me both time and auto expense by allowing me to avoid unforeseen congestion.
